As of March 15, 2008

Inclusion on this list indicates only that the **specific** version of payment application has successfully completed an assessment following Payment Application Best Practices. Please be advised that Visa has not performed tests of the functionality, performance or suitability of any of the applications and/or products listed, and Visa makes no endorsement of applications or products, or of their respective developers or distributors. The information is provided "as is" with no warranties, expressed or implied, including, but not limited to, the implied warranties of merchantability and fitness for a particular purpose and/or non-infringement. Updates to this list will be made periodically, and changes may be made to the listing of products that affect Visa's views. Acquirers remain responsible for performing their own evaluation and due diligence, to ensure the PCI DSS compliance of their merchants and agents. The applications reviewed may be only one component of a suite of payment applications, with the suite consisting of other vendors' products or plug-ins that has not been reviewed. To be a fully compliant solution, all applications in a payment suite will need to undergo this same review. Visa has not evaluated and does not express any opinion as to the compatibility or effectiveness of any other vendor's products or plug-ins when used in conjunction with another vendor's payment application.

PABP reviews are valid for one year, with annual attestation due to Visa one year from the below "VALIDATION DATE". Attestations that are from 1-60 days late are noted in **yellow** and reports that are from 60-90 days late are noted in **red**. Entities with reports over 90 days past due will be removed from this list.
